HOW DOES PUSH NOTIFICATION WORK?

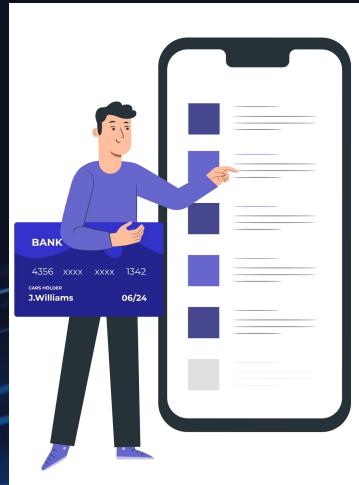

STEP 1

The user interacts with site while surfing the Internet and if he likes the content he will subscribe to updates.

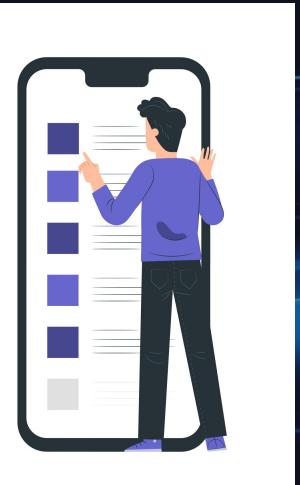

STEP 2

The user presses the allow button on the permission prompt.

STEP 3

This user gets to the subscriber base and receives web push notifications.

STEP 4

The conversion increased when the user click on push notification with your product or service and gets to your website.

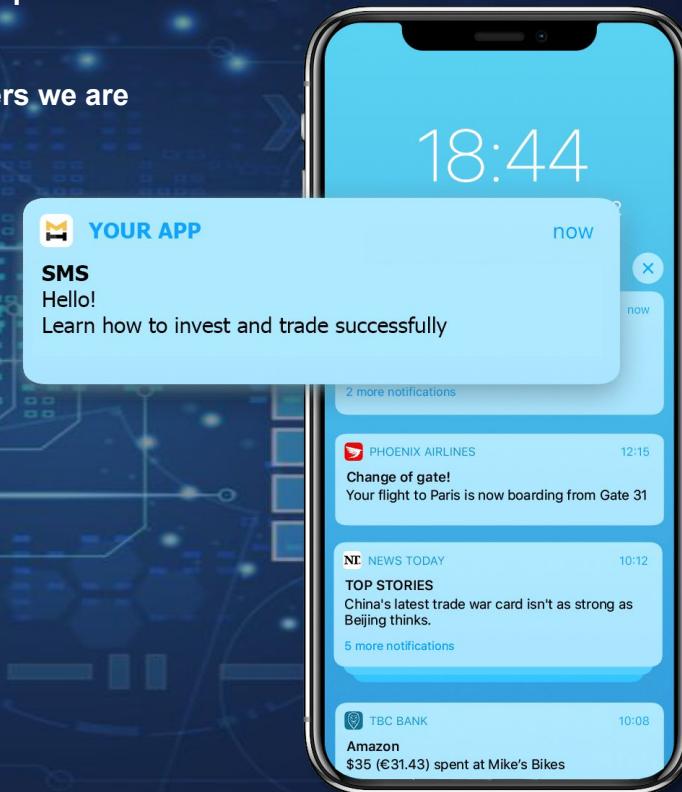

SMS TRAFFIC

Personalised short message strictly to user's mobile phone - the quickest way to get him involved in promo we send.

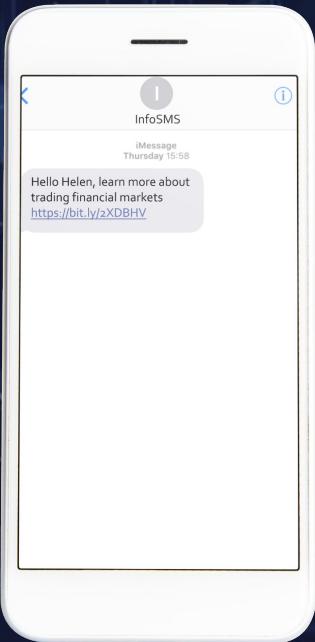

Due to narrow targeting options and ability to work with prelanders we are reaching potentially interested users.

Targeting options included:

- Approach a user by his/her first name
- Gender
- GEO targeting
- Time targeting (specific days/hours)
- Operating system
- Mobile Operators
- Hobbies and Interests

SMS TRAFFIC

User gets SMS

User clicks on

NATIVE ADS

Ad is displayed within a web page's content and aims to look relevant to this content. Often appears on the website under headline "Recommended"

Available targeting options:

- Ad exchange / source
- Country
- Region/State
- City
- Source Type (All / In App / Web)
- Device (all / Mobile / Desktop / Tablet)
- Operating System (All / Android / IOS / Windows OS / Linux / Chrome OS / Other)
- Connection type (All / WiFi / Mobile (3G/4G/LTE))
- Mobile Carriers
- IP addresses
- Whitelist and Blacklist of apps, sites and widgets
